

For the three months ended March 31, 2015, the net asset value per Common Share increased 1.51% while the investment return to our stockholders decreased by 0.06%. By comparison, our benchmark, the Standard & Poor's 500 Stock Index (including income), increased 0.96%. For the twelve months ended March 31, 2015, the return on the net asset value per Common Share increased by 7.77%, and the return to our stockholders increased by 9.17%; these compare with an increase of 12.75% for the S&P 500. During both periods, the discount at which our shares traded continued to fluctuate and on March 31, 2015, it was 13.4%.

As detailed in the accompanying financial statements (unaudited), as of March 31, 2015, the net assets applicable to the Company's Common Stock were \$1,220,964,927 equal to \$40.37 per Common Share.

The increase in net assets resulting from operations for the three months ended March 31, 2015 was \$14,888,724. During this period, the net realized gain on investments sold was \$8,341,230 and the increase in net unrealized appreciation was \$5,816,238. Net investment income for the three months was \$3,559,249 and distributions to Preferred Stockholders amounted to \$2,827,993.

During the three months, 625,974 shares of the Company's Common Stock were repurchased for \$21,823,502 at an average discount from net asset value of 13.6%.

The positive returns of the past six years continued through the first quarter, albeit at a modest pace. While the US equity market may appear fully valued, it remains supported by historically high operating margins, low interest rates, and a favorable competitive position. Rather than attempting to grow sales by pursuing marginal revenue opportunities as they have in the past, companies have generally employed responsible capital allocation strategies given the environment.

The conundrum for investors, which we described last year as the divergence between the moderate advance of the real economy and the stronger performance of the financial economy, remains. The U.S. economy entered 2015 with modestly weakened momentum just as it had in 2014. This year, the strength in the U.S. dollar will likely weigh on export oriented industries as well domestic companies competing with lower priced imports. West coast port closures, due to striking workers, also had a negative impact as did colder temperatures, particularly in the population-dense northeastern quarter of the country. Additional weights on first quarter GDP growth include: the oil and gas industry which faces a difficult price environment, has employed an aggressive cost cutting strategy, and has reduced capital expenditures; and significant geo-political uncertainty as the U.S. attempts to diplomatically deal with a number of crises.

Over the near to mid-term, reduced energy costs should be favorable for the economy. Aside from increased premiums for healthcare insurance, households are doing better than

a year ago. Though still muted, wage growth continues on an upward trajectory and conversion of labor from part-time to full-time has also improved, which is a positive both for household income and formations. Unemployment claims data continue to suggest that the labor market is in good shape and consumer confidence has been relatively strong during this period. These and other factors might lead one to conclude that a number of economic concerns confronting the economy may be temporal in nature.

Likewise, strong performance of many of our trading partners' equity markets, in local currency terms, has largely been based on aggressive monetary policies which may improve growth worldwide. Europe, in particular, has enjoyed strong financial market returns as have a number of emerging markets. Asset appreciation and currency weakness in these countries is seemingly having the desired effect of elevating consumption, reducing uncertainty, and improving balances of trade, though it remains to be seen how robust the impact will be longer term.

In sum, investors in U.S. equity markets may continue to grapple with the notion of weaker than anticipated economic growth. Historically, a strong U.S. dollar has had a favorable impact on financial markets and the economy (subject to limits of course). Despite a pledge from the Federal Reserve to raise interest rates soon, they appear likely to remain historically low for the foreseeable future as economic growth remains muted and inflation is benefitting from lower import costs both on inputs and finished products. The U.S. economy appears capable of returning to its 2%-2.5% trajectory, providing a relatively stable environment for companies to continue to repurchase shares, deploy resources in a disciplined manner through capital expenditures and engage in merger and acquisition activity to reduce costs. Thus, despite six strong years of financial gains, the current environment remains favorable for equities when compared to fixed income investments. And though gains ahead may be more muted given the significant outperformance of the financial economy when compared to the real economy, it is not without historic precedent.

Information about the Company, including our investment objectives, operating policies and procedures, investment results, record of dividend and distribution payments, financial reports and press releases, is on our website and has been updated through March 31, 2015. It can be accessed on the internet at www.generalamericaninvestors.com.

By Order of the Board of Directors,
GENERAL AMERICAN INVESTORS COMPANY, INC.

Jeffrey W. Priest
President and Chief Executive Officer

April 15, 2015

General American Investors

1. **SIGNIFICANT ACCOUNTING POLICIES** - General American Investors Company, Inc. (the “Company”), established in 1927, is registered under the Investment Company Act of 1940 as a closed-end, diversified management investment company. It is internally managed by its officers under the direction of the Board of Directors.

The accompanying financial statements have been prepared in accordance with United States generally accepted accounting principles (“U.S. GAAP”) pursuant to the requirements for reporting: Accounting Standards Codification 946, *Financial Services - Investment Companies* (“ASC946”), and Articles 6 and 10 of Regulation S-X.

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income, expenses and gains and losses during the reported period. Changes in the economic environment, financial markets, and any other parameters used in determining these estimates could cause actual results to differ, and these differences could be material.

a. **SECURITY VALUATION** Equity securities traded on a national securities exchange are valued at the last reported sales price on the last business day of the period. Equity securities reported on the NASDAQ national market are valued at the official closing price on that day. Listed and NASDAQ equity securities for which no sales are reported on that day and other securities traded in the over-the-counter market are valued at the last bid price (asked price for options written) on the valuation date. Equity securities traded primarily in foreign markets are valued at the closing price of such securities on their respective exchanges or markets. Corporate debt securities, domestic and foreign, are generally traded in the over-the-counter market rather than on a securities exchange. The Company utilizes the latest bid prices provided by independent dealers and information with respect to transactions in such securities to determine current market value. If, after the close of foreign markets, conditions change significantly, the price of certain foreign securities may be adjusted to reflect fair value as of the time of the valuation of the portfolio. Investments in money market funds are valued at their net asset value. Special holdings (restricted securities) and other securities for which quotations are not readily available are valued at fair value determined in good faith pursuant to specific procedures appropriate to each security as established by and under the general supervision of the Board of Directors. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the price used by other investors or the price that may be realized upon the actual sale of the security.

b. **OPTIONS** The Company may purchase and write (sell) put and call options. The Company typically purchases put options or writes call options to hedge the value of portfolio investments while it typically purchases call options and writes put options to obtain equity market exposure under specified circumstances. The risk associated with purchasing an option is that the Company pays a premium whether or not the option is exercised. Additionally, the Company bears the risk of loss of the premium and a change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. Premiums received from writing options are reported as a liability on the Statement of Assets and Liabilities. Those that expire unexercised are treated by the Company on the expiration date as realized gains on written option transactions in the Statement of Operations. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss on written option transactions in the Statement of Operations. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Company has realized a gain or loss on investments in the Statement of Operations. If a put option is exercised, the premium reduces the cost basis for the securities purchased by the Company and is parenthetically disclosed under cost of investments on the Statement of Assets and Liabilities. The Company as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option. See Note 4 for written option activity.

c. **SECURITY TRANSACTIONS AND INVESTMENT INCOME** Security transactions are recorded as of the trade date. Dividend income and distributions to stockholders are recorded as of the ex-dividend dates. Interest income, adjusted for amortization of discount and premium on investments, is earned from settlement date and is recognized on the accrual basis. Cost of short-term investments represent amortized cost.

d. **FOREIGN CURRENCY TRANSLATION AND TRANSACTIONS** Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies versus U.S. dollars on the date of valuation. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Company’s Board of Directors. The Company does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. companies as a result of, among other factors, the possibility of political or economic instability or the level of governmental supervision and regulation of foreign securities markets.

e. **DIVIDENDS AND DISTRIBUTIONS** The Company expects to pay dividends of net investment income and distributions of net realized capital and currency gains, if any, annually to common shareholders and quarterly to preferred shareholders. Dividends and distributions to common and preferred shareholders, which are determined in accordance with Federal income tax regulations are recorded on the ex-dividend date. Permanent book/tax differences relating to income and gains are reclassified to paid-in capital as they arise.

f. **FEDERAL INCOME TAXES** The Company’s policy is to fulfill the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all taxable income to its stockholders. Accordingly, no provision for Federal income taxes is required. In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Company’s tax positions taken or expected to be taken on Federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Company’s financial statements.

g. **CONTINGENT LIABILITIES** Amounts related to contingent liabilities are accrued if it is probable that a liability has been incurred and an amount is reasonably estimable. Management evaluates whether there are incremental legal or other costs directly associated with the ultimate resolution of a matter that are reasonably estimable and, if so, they are included in the accrual.

h. **INDEMNIFICATIONS** In the ordinary course of business, the Company enters into contracts that contain a variety of indemnifications. The Company’s maximum exposure under these arrangements is unknown. However, the Company has not had prior claims or losses pursuant to these indemnification provisions and expects the risk of loss thereunder to be remote.

General American Investors

2. **FAIR VALUE MEASUREMENTS** - Various data inputs are used in determining the value of the Company's investments. These inputs are summarized in a hierarchy consisting of the three broad levels listed below:

Level 1 - quoted prices in active markets for identical securities (including money market funds which are valued using amortized cost and which transact at net asset value, typically \$1 per share),

Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, credit risk, etc.), and

Level 3 - significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value the Company's net assets as of March 31, 2015:

Assets	Level 1	Level 2	Level 3	Total
Common stocks	\$1,287,928,724	—	—	\$1,287,928,724
Money market fund	131,648,548	—	—	131,648,548
Total	\$1,419,577,272	—	—	\$1,419,577,272

Transfers of Level 3 securities, if any, are reported as of the actual date of reclassification.

3. **PURCHASES AND SALES OF SECURITIES** - Purchases and sales of securities (other than short-term securities and options) for the three months ended March 31, 2015 amounted to \$69,420,092 and \$116,669,564, on long transactions, respectively.

4. **WRITTEN OPTIONS** - The level of activity in written options varies from year to year based upon market conditions. Transactions in written covered call options during the three months ended March 31, 2015 were as follows:

	Covered Calls	
	Contracts	Premiums
Options outstanding, December 31, 2014	2,100	\$245,504
Options terminated in closing purchase transaction	(1,900)	(200,966)
Options expired	(200)	(44,538)
Options outstanding, March 31, 2015	0	\$0

5. **CAPITAL STOCK AND DIVIDEND DISTRIBUTIONS** - The authorized capital stock of the Company consists of 50,000,000 shares of Common Stock, \$1.00 par value, and 10,000,000 shares of Preferred Stock, \$1.00 par value. With respect to the Common Stock, 30,245,870 shares were issued and outstanding; 8,000,000 Preferred Shares were originally issued and 7,604,687 were outstanding on March 31, 2015.

On September 24, 2003, the Company issued and sold 8,000,000 shares of its 5.95% Cumulative Preferred Stock, Series B in an underwritten offering. The Preferred Shares were noncallable for the 5 year period ended September 24, 2008 and have a liquidation preference of \$25.00 per share plus accumulated and unpaid dividends to the date of redemption. On December 10, 2008, the Board of Directors authorized the repurchase of up to 1 million Preferred Shares in the open market at prices below \$25.00 per share. To date, 395,313 shares have been repurchased.

The Company allocates distributions from net capital gains and other types of income proportionately among holders of shares of Common Stock and Preferred Stock. To the extent that dividends on the shares of Preferred Stock are not paid from net capital gains, they will be paid from investment company taxable income, or will represent a return of capital.

Under the Investment Company Act of 1940, the Company is required to maintain an asset coverage of at least 200% of the Preferred Stock. In addition, pursuant to Moody's Investor Service, Inc. Rating Agency Guidelines, the Company is required to maintain a certain discounted asset coverage for its portfolio that equals or exceeds a Basic Maintenance Amount. If the Company fails to meet these requirements in the future and does not cure such failure, the Company may be required to redeem, in whole or in part, shares of Preferred Stock at a redemption price of \$25.00 per share plus accumulated and unpaid dividends. In addition, failure to meet the foregoing asset coverage requirements could restrict the Company's ability to pay dividends on shares of Common Stock and could lead to sales of portfolio securities at inopportune times.

The holders of Preferred Stock have voting rights equivalent to those of the holders of Common Stock (one vote per share) and, generally, vote together with the holders of Common Stock as a single class.

Holders of Preferred Stock will elect two members to the Company's Board of Directors and the holders of Preferred and Common Stock, voting as a single class, will elect the remaining directors. If the Company fails to pay dividends on the Preferred Stock in an amount equal to two full years' dividends, the holders of Preferred Stock will have the right to elect a majority of the directors. In addition, the Investment Company Act of 1940 requires that approval of the holders of a majority of any outstanding Preferred Shares, voting separately as a class, would be required to (a) adopt any plan of reorganization that would adversely affect the Preferred Stock and (b) take any action requiring a vote of security holders, including, among other things, changes in the Company's subclassification as a closed-end investment company or changes in its fundamental investment policies.

The Company presents its Preferred Stock, for which its redemption is outside of the Company's control, outside of the net assets applicable to Common Stock in the Statement of Assets and Liabilities.

Transactions in Common Stock during the three months ended March 31, 2015 and the year ended December 31, 2014 were as follows:

	Shares		Amount	
	2015	2014	2015	2014
Shares issued in payment of dividends and distributions (includes 1,473,643 shares issued from treasury)	—	1,473,643	—	\$1,473,643
Increase in paid-in capital	—	—	—	50,413,327
Total increase	—	—	—	51,886,970
Shares purchased (at an average discount from net asset value of 13.6% and 14.4%, respectively)	(625,974)	(541,367)	(625,974)	(541,367)
Decrease in paid-in capital	—	—	(21,197,528)	(18,363,758)
Total decrease	—	—	(21,823,502)	(18,905,125)
Net increase (decrease)	(625,974)	932,276	(\$21,823,502)	\$32,981,845

At March 31, 2015, the Company held in its treasury 1,735,002 shares of Common Stock with an aggregate cost in the amount of \$59,131,030.

General American Investors

5. CAPITAL STOCK AND DIVIDEND DISTRIBUTIONS - (Continued from bottom of previous page.)

The tax basis distribution during the year ended December 31, 2014 is as follows: ordinary distributions of \$18,792,969 and net capital gains distributions of \$95,645,589. As of December 31, 2014, distributable earnings on a tax basis included \$2,028,405 from undistributed net capital gains and \$605,509,163 from net unrealized appreciation on investments if realized in future years. Reclassifications arising from permanent "book/tax" differences reflect non-tax deductible expenses and redesignation of dividends during the year ended December 31, 2014. As a result, additional paid-in capital was decreased by \$724, accumulated net realized gain on investment transactions was decreased by \$98,539 and net investment increased by \$99,263. As of December 31, 2014 the Company had straddle loss deferrals of \$252,864. Net assets were not affected by this reclassification.

6. OFFICERS' COMPENSATION - The aggregate compensation accrued and paid by the Company during the three months ended March 31, 2015 to its officers (identified on back cover) amounted to \$1,694,000.

7. BENEFIT PLANS - The Company has funded (qualified) and unfunded (supplemental) noncontributory defined benefit pension plans that are available to its employees. The pension plans provide defined benefits based on years of service and final average salary with an offset for a portion of social security covered compensation. The components of the net periodic benefit cost (income) of the plans for the three months ended March 31, 2015 were:

Service cost	\$150,995
Interest cost	223,136
Expected return on plan assets	(316,433)
Amortization of prior service cost	10,241
Amortization of recognized net actuarial loss	160,533
Net periodic benefit cost	<u>\$228,472</u>

The Company recognizes the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in the Statement of Assets and Liabilities and recognizes changes in funded status in the year in which the changes occur through other comprehensive income.

The Company also has funded (qualified) and unfunded (supplemental) defined contribution thrift plans that are available to its employees. The aggregate cost of such plans for the three months ended March 31, 2015 was \$135,570. The qualified thrift plan acquired 5,500 shares of the Company's Common Stock during the three months ended March 31, 2015 and held 544,088 shares of the Company's Common Stock at March 31, 2015.

8. OPERATING LEASE COMMITMENT - In September 2007, the Company entered into an operating lease agreement for office space which expires in February 2018 and provided for aggregate rental payments of approximately \$10,755,000, net of construction credits. The lease agreement contains clauses whereby the Company receives free rent for a specified number of months and credit towards construction of office improvements, and incurs escalations annually relating to operating costs and real property taxes and to annual rent charges beginning in February 2013. The Company has the option to renew the lease after February 2018 for five years at market rates. Rental expense approximated \$283,000 for the three months ended March 31, 2015. Minimum rental commitments under the operating lease are approximately \$1,183,000 in 2015 through 2017, and \$99,000 in 2018.

OTHER MATTERS (Unaudited)

Previous purchases of the Company's Common and Preferred Stock are set forth in Note 5 on pages 10 and 11. Prospective purchases of Common and Preferred Stock may be made at such times, at such prices, in such amounts and in such manner as the Board of Directors may deem advisable.

The policies and procedures used by the Company to determine how to vote proxies relating to portfolio securities and the Company's proxy voting record for the twelve-month period ended June 30, 2014 are available: (1) without charge, upon request, by calling us at our toll-free telephone number (1-800-436-8401), (2) on the Company's website at www.generalamericaninvestors.com and (3) on the Securities and Exchange Commission's website at www.sec.gov.

In addition to distributing financial statements as of the end of each quarter, General American Investors files a Quarterly Schedule of Portfolio Holdings (Form N-Q) with the Securities and Exchange Commission ("SEC") as of the end of the first and third calendar quarters. The Company's Forms N-Q are available at www.generalamericaninvestors.com and on the SEC's website: www.sec.gov. Also, Forms N-Q may be reviewed and copied at the SEC's Public Reference Room in Washington, DC. Information on the operation of the SEC's Public Reference Room may be obtained by calling 1-800-SEC-0330. A copy of the Company's Form N-Q may be obtained by calling us at 1-800-436-8401.

On May 16, 2014, the Company submitted a CEO annual certification to the New York Stock Exchange ("NYSE") on which the Company's principal executive officer certified that he was not aware, as of that date, of any violation by the Company of the NYSE's Corporate Governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Company's principal executive and principal financial officer made quarterly certifications, included in filings with the SEC on Forms N-CSR and N-Q relating to, among other things, the Company's disclosure controls and procedures and internal control over financial reporting, as applicable.
