General American Investors' net asset value (NAV) per Common Share (assuming reinvestment of all dividends) decreased 14.1% for the year ended December 31, 2022. The U.S. stock market was down 18.1% for the year, as measured by our benchmark, the Standard & Poor's 500 Stock Index (including income). The return to our Common Stockholders decreased by 14.9% and the discount at which our shares traded to their NAV continued to fluctuate and on December 31, 2022, it was 16.7%.

The table that follows provides a comprehensive presentation of our performance and compares our returns on an annualized basis with the S&P 500.

Years	Stockholder Return (Market Value)	NAV Return	S&P 500
3	4.7%	6.0%	7.7%
5	7.9	8.4	9.4
10	10.3	10.4	12.6
20	8.5	8.7	9.8
30	9.1	9.8	9.6
40	11.1	11.7	11.2
50	11.5	11.6	10.3

U.S. equity markets performed poorly throughout much of 2022, punctuated by rallies typical of bear markets. There remains significant concern about the quality of earnings many companies may report as they experience slowing revenue growth and operating margin erosion. A recent reversal in foreign currency trends may provide a tailwind to large companies' earnings and revenues in contrast to the headwinds present for most of 2022 from a strong U.S. dollar.

Economic data in the U.S. has been deteriorating highlighted by surveys for goods and services industries that have tipped into levels typical of the onset of a recession. Home sales and construction declined throughout the year, with rising mortgage rates. Savings rates have plunged from their pandemic highs as inflation takes a larger share of U.S. household income and wages fail to keep up. Fortunately, a modest cushion leftover from large government pandemic payments to households, local governments, and businesses remains. Amid the generally weak economic data, employment has remained strong, with more than two million jobs created in the last seven months of the year. Further, inflation trends experienced a sharp slowdown as the year progressed, helped mainly by improving supply chains and the U.S. government's sizeable release from the Strategic Petroleum Reserve. There is widespread debate about whether these factors will lead to a U.S. economic recession or a soft landing.

Financial conditions in the world economy are worsening as central banks pull back their pandemic-induced easy money policies. The receding fund flows may exacerbate weakening economic growth and lead to higher volatility in financial assets and perhaps poorer performance for equities. Furthermore, the Federal Reserve appears focused on restricting financial conditions until inflation and economic activity slow demonstrably and is likely to push against easing conditions created by financial markets. Conversely, for the short term, the recent retirement of China's Zero Covid policy, planned changes in the basket of goods weightings of the U.S. Consumer Price Index, and a warmer-than-anticipated winter for Europe may improve the inflation outlook and growth prospects for the world economy.

In short, the investment environment has become more complex, with valuations still reflective of abnormally high operating margins and elevated revenue growth expectations compared to historical norms around recessions. Despite a painful corrective process last year, equities may experience a further adjustment period, albeit punctuated by periods of outperformance, until the still-fluid economic data reaches the goals of the central bankers. We continue to view the environment as favorable over the long term for equities. In the near term, facing more competition from fixed-income securities, equities progress may be halting.

By Order of the Board of Directors,

Jeffrey W. Priest
President and Chief Executive Officer

January 25, 2023

Corporate Overview

General American Investors, established in 1927, is one of the nation's oldest closed-end investment companies. It is an independent organization that is internally managed. For regulatory purposes, the Company is classified as a diversified, closed-end management investment company; it is registered under and subject to the Investment Company Act of 1940 and Sub-Chapter M of the Internal Revenue Code.

Investment Policy

The primary objective of the Company is long-term capital appreciation. Lesser emphasis is placed on current income. In seeking to achieve its primary objective, the Company invests principally in common stocks believed by its management to have better than average growth potential.

The Company's investment approach focuses on the selection of individual stocks, each of which is expected to meet a clearly defined portfolio objective. A continuous investment research program, which stresses fundamental security analysis, is carried on by the officers and staff of the Company under the oversight of the Board of Directors. The Directors have a broad range of experience in business and financial affairs.

Portfolio Manager

Mr. Jeffrey W. Priest, has been President of the Company since February 1, 2012 and has been responsible for the management of the Company since January 1, 2013 when he was appointed Chief Executive Officer and Portfolio Manager. Mr. Priest joined the Company in 2010 as a senior investment analyst and has spent his entire 35-year business career on Wall Street. Mr. Priest succeeds Mr. Spencer Davidson who served as Chief Executive Officer and Portfolio Manager from 1995 through 2012.

"GAM" Common Stock

As a closed-end investment company, the Company does not offer its shares continuously. The Common Stock is listed on The New York Stock Exchange (symbol, GAM) and can be bought or sold in the same manner as all listed stocks. Net asset value is computed and published on the Company's website daily (on an unaudited basis). It is also available on most electronic quotation services using the symbol "XGAMX." Net asset value per share (NAV), market price, and the discount or premium from NAV as of the close of each week, is published in *Barron's* and *The Wall Street Journal*, Monday edition.

Shares of the Company usually sell at a discount to NAV, as do the shares of most other domestic equity closed-end investment companies.

Since March 1995, the Board of Directors has authorized the repurchase of Common Stock in the open market when the shares trade at a discount to NAV of at least 8%. To date, 31,692,637 shares have been repurchased.

"GAM Pr B" Preferred Stock

On September 24, 2003, the Company issued and sold in an underwritten offering 8,000,000 shares of its 5.95% Cumulative Preferred Stock, Series B with a liquidation preference of \$25 per share (\$200,000,000 in the aggregate). The Preferred Shares are rated "A1" by Moody's Investors Service, Inc. and are listed and traded on The New York Stock Exchange (symbol, GAM Pr B). The Preferred Shares are available to leverage the investment performance of the Common Stockholders; higher market volatility for the Common Stockholders may result.

The Board of Directors has authorized the repurchase of up to 2 million Preferred Shares in the open market at prices below \$25 per share. To date, 395,313 shares have been repurchased.

Dividend and Distribution Policy

The Company's dividend and distribution policy is to pay to stockholders before year-end substantially all ordinary income estimated for the full year and capital gains realized during the ten-month period ended October 31 of that year. If any additional capital gains are realized and available or ordinary income is earned during the last two months of the year, a "spill-over" distribution of these amounts may be paid. Dividends and distributions on shares of Preferred Stock are paid quarterly. Distributions from capital gains and dividends from ordinary income are allocated proportionately among holders of shares of Common Stock and Preferred Stock.

Dividends from income have been paid continuously on the Common Stock since 1939 and capital gain distributions in varying amounts have been paid for each of the years 1943-2022 (except for the year 1974). (A table listing dividends and distributions paid during the 10-year period 2013-2022 is shown at the bottom of page 5.) To the extent that shares can be issued, dividends and distributions are paid to Common Stockholders in additional shares of Common Stock unless the stockholder specifically requests payment in cash.

Proxy Voting Policies, Procedures and Record

The policies and procedures used by the Company to determine how to vote proxies relating to portfolio securities and the Company's proxy voting record for the 12-month period ended June 30, 2022 are available: (1) without charge, upon request, by calling the Company at its toll-free number (1-800-436-8401), (2) on the Company's website at www.generalamericaninvestors.com and (3) on the Securities and Exchange Commission's website at www.sec.gov.

Direct Registration

The Company makes available direct registration for its Common Shareholders. Direct registration, an element of the Investors Choice Plan administered by our transfer agent, is a system that allows for book-entry ownership and electronic transfer of our Common Shares. Accordingly, when Common Shareholders, who hold their shares directly, receive new shares resulting from a purchase, transfer or dividend payment, they will receive a statement showing the credit of the new shares as well as their Plan account and certificated share balances. A brochure which describes the features and benefits of the Investors Choice Plan, including the ability of shareholders to deposit certificates with our transfer agent, can be obtained by calling American Stock Transfer & Trust Company at 1-800-413-5499, calling the Company at 1-800-436-8401 or visiting our website: www.generalamericaninvestors.com - click on Distributions & Reports, then Report Downloads.

Privacy Policy and Practices

The Company's transfer agent collects nonpublic personal information about its direct stockholders with respect to their transactions in shares of the Company's securities (those stockholders whose shares are registered directly in their names). This information includes the stockholder's address, tax identification or Social Security number and dividend elections. We do not have knowledge of, nor do we collect personal information about, stockholders who hold the Company's securities in "street name" registration.

We do not disclose any nonpublic personal information about our current or former stockholders to anyone, except as required by law. We restrict access to nonpublic personal information about our stockholders to those few employees who need to know that information to perform their responsibilities. We maintain safeguards to comply with federal standards to secure our stockholders' information.

The investment return for a Common Stockholder of General American Investors (GAM) over the 10 years ended December 31, 2022 is shown in the table and in the accompanying chart below. The return based on GAM's net asset value (NAV) per Common Share in comparison to the change in the Standard & Poor's 500 Stock Index (S&P 500) is also displayed. Each illustration assumes an investment of \$10,000 at the beginning of 2013.

Stockholder Return is the return a Common Stockholder of GAM would have achieved assuming reinvestment of all dividends and distributions at the actual reinvestment price and of all cash dividends and distributions at the market price on the ex-dividend date.

Net Asset Value (NAV) Return is the return on shares of the Company's Common Stock based on the NAV per share, including the reinvestment of all dividends and distributions at the reinvestment prices indicated above.

Standard & Poor's 500 Return is the total rate of return on this widely-recognized, unmanaged index which is a measure of general stock market performance, including dividend income.

Past performance may not be indicative of future results.

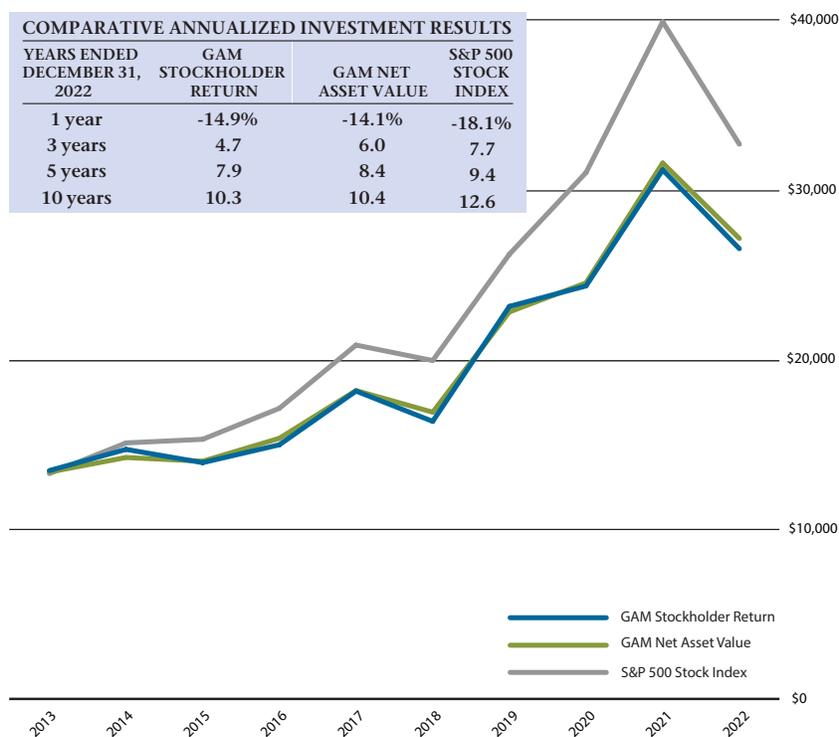

The following tables and graph do not reflect the deduction of taxes that a stockholder would pay on Company distributions or the sale of Company shares.

YEAR	GENERAL AMERICAN INVESTORS				STANDARD & POOR'S 500

10-YEAR INVESTMENT RESULTS

ASSUMING AN INITIAL INVESTMENT OF \$10,000

CUMULATIVE VALUE OF INVESTMENT

During the year ended December 31, 2022, the Company performed better than its benchmark, the Standard & Poor's 500 Stock Index (S&P 500). On a net asset value basis, the Company's return was (14.1)% including reinvestment of dividends and distributions. On a market price per share basis, the return to our common shareholders was (14.9)% including reinvestment of dividends and distributions while the S&P 500 returned (18.1)% including income.

The returns noted above were realized in an environment of heightened inflation, rapidly increasing interest rates and quantitative tightening (balance sheet reduction) by the Federal Reserve Bank, a generally slowing economy, and residual fiscal stimulus in response to the COVID-19 pandemic. With this backdrop, there were two periods of significant market volatility that occurred, first, during the month of June and a second period during the months of September into October. Although these two periods of heightened volatility were relatively brief, there was a general ongoing decline in stock market valuations during the course of calendar year 2022.

As of December 31, 2022, the S&P 500 Index was comprised of 503 constituent companies having a median market capitalization of \$29 billion versus 505 constituent companies with a median market capitalization of \$34 billion as of December 31, 2021 per S&P Dow Jones Indices. Contributing to this contraction in median valuation, the Price/Earnings ratio for the S&P 500 Index contracted from 25.6 at December 31, 2021 to 19.2 at December 31, 2022. The Company holds shares in 60 portfolio companies, in addition to a money market fund and U.S. Treasury Bills to serve as liquidity, and the median market capitalization of these portfolio companies is approximately \$46 billion. As a result, any overlap in portfolio positions between the Company and the benchmark is limited. Furthermore, the Company's percentage ownership in a given portfolio position or the period of ownership of a particular position by the Company can represent additional variations between the Company and the benchmark. Lastly, there are several operational differences between the Company and the S&P 500 including the fact that the Company incurs expenses (1.13% of common net assets) to conduct its activities, maintains a level of liquidity to take advantage of market opportunities (approximately 14% of common net assets), and is modestly leveraged (approximately 18% relative to common net assets). The S&P 500 does not incur expenses, maintain liquidity (fully invested at all times), and it is not levered. Hence, a discussion comparing differences in return between the Company and the S&P 500 should be conducted at a relatively high level.

The S&P 500 Index is comprised of eleven industry sector classifications as follows: Information Technology, Health Care, Consumer Discretionary, Financials, Communication Services, Industrials, Consumer Staples, Real Estate, Energy, Materials, and Utilities. Within these sectors, various companies are categorized. As a practical matter, the Company does not invest in all of these sectors all of the time or at the same level as the S&P 500 asset allocation. Hence, performance differences naturally occur due to these investment and allocation decisions.

During 2022, the Company underperformed in three industry sectors relative to the S&P 500 Index (Energy, Consumer Staples and Health Care sectors), outperformed relative to the S&P 500 Index in five other industry sectors (Real Estate, Financials, Materials, Consumer Discretionary, and Communication Services sectors), and performed in-line (approximately a 3% deviation or less) in three other industry sectors relative to the S&P 500 Index (Industrials, Information Technology, and Utilities sectors). Underperformance in the Energy sector by approximately 17% was due to a lack of exposure to high beta stocks in that sector. Underperformance in the Consumer Staples sector by approximately 8% was primarily due to the adverse impact of European currencies and portfolio stock selection (e.g., Nestle and Costco). Underperformance in the Health Care sector by approximately 7% was primarily the result of allocation to pharma companies with a heavier weighting to biotechnology stocks and nascent companies (e.g., Valneva, Paratek, and Azenta) and a lack of exposure to medical insurers.

The Company outperformed in the Real Estate sector by approximately 26% due entirely to a lack of exposure to that sector. Outperformance in the Financials sector by approximately 25% was due primarily to exposure to reinsurers (e.g., Arch, Axis, and Everest). Outperformance in the Materials sector by approximately 13% was due to early in the year sales of certain companies (e.g., Cleveland Cliffs) and exposure to gold mining companies throughout the year (e.g., Agnico Eagle Mines and Barrick Gold). Outperformance in the Consumer Discretionary sector by approximately 9% was due to reduced or no exposure to certain higher beta stocks (e.g., Amazon) and exposure to certain stocks that performed very well (e.g., TJX Companies and Bath & Body Works). Outperformance in the Communication Services sector by approximately 7% was due to no exposure or reduced exposure to certain companies that had lesser performance (e.g., AT&T, Verizon and Meta) and exposure to T-Mobile.

The Company views its performance deviation relative to the S&P 500 Index in the Industrials, Information Technology, and Utilities sectors to be relatively insignificant.

DIVIDENDS AND DISTRIBUTIONS PER COMMON SHARE (2013-2022)

The table below shows dividends and distributions on the Company's Common Stock for the prior 10-year period. Amounts shown are based upon the year in which the income was earned, not the year paid. Spill-over payments made after year-end are attributable to income and gains earned in the prior year.

EARNINGS SOURCE				EARNINGS SOURCE

The company's management team exercises prudent underwriting discipline, insurance cycle management, expense control, and share buybacks yielding above average book value growth and shareholder returns.	913,403	57,343,440	5.5
MICROSOFT CORPORATION Microsoft is a global provider of software, services, and hardware devices. The company produces the Windows operating system, Office productivity suite, Azure public cloud service, and Xbox gaming console.	235,000	56,357,700	5.4
BERKSHIRE HATHAWAY INC. - CLASS A Berkshire Hathaway is a holding company owning many subsidiaries mainly in the insurance, railroad, utility/energy, aerospace, manufacturing, retail, and finance industries. The company also holds various common stock investments. Berkshire is positioned to provide long term, relatively defensive returns due to its conservative balance sheet.	110	51,558,206	5.0
ALPHABET INC. - CLASS C Alphabet is a global technology firm with a dominant market share in internet search, online advertising, desktop and mobile operating systems, as well as a growing share of cloud computing platforms. Alphabet has a wide competitive moat, a strong business franchise, and potential growth catalysts.	510,000	45,252,300	4.3
THE TJX COMPANIES, INC. Through its T.J. Maxx and Marshalls divisions, TJX is the leading off-price retailer. The continued growth of these divisions in the U.S. and Europe, along with expansion of related U.S. and foreign off-price formats, provide ongoing growth opportunities.	550,092	43,787,323	4.2
ASML HOLDING N.V. ASML is a global provider of lithography systems for the semiconductor industry, manufacturing highly complex equipment critical to the production of integrated circuits or microchips. ASML has established a dominant market share in next-generation lithography. ASML has strong growth prospects, margin leverage, and shareholder-friendly capital allocation.	79,600	43,493,440	4.2
EVEREST RE GROUP, LTD. Everest Re is one of the largest independent U.S. property and casualty reinsurers, generates annual premiums of approximately \$14 billion, has a high quality investment portfolio, and a well-reserved A+ balance sheet. This Bermuda domiciled company has a strong management team that exercises prudent underwriting discipline and efficient expense control, resulting in above-average earnings and book value growth.	129,196	42,798,759	4.1
APPLE INC. Apple designs, manufactures and markets smartphones, personal computers, tablets, wearables and accessories, and sells a variety of related services. The company's growth prospects look favorable as the shift to mobile computing expands globally and as more products and services are added to the Apple ecosystem.	321,000	41,707,530	4.0
NESTLÉ S.A. Nestlé is a global food company with a favorably-positioned product portfolio and a strong balance sheet. Market share, volume growth, pricing power, expense control, and capital management offer durable total return potential.	325,000	37,658,033	3.6

(see notes to financial statements)

1. SIGNIFICANT ACCOUNTING POLICIES AND OTHER MATTERS

General American Investors Company, Inc. (the “Company”), established in 1927, is registered under the Investment Company Act of 1940 as a closed-end, diversified management investment company. It is internally managed by its officers under the direction of the Board of Directors.

The accompanying financial statements have been prepared in accordance with United States generally accepted accounting principles (“U.S. GAAP”) pursuant to the requirements for reporting; Accounting Standards Codification 946, *Financial Services - Investment Companies* (“ASC 946”), and Regulation S-X.

The preparation of financial statements in accordance with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of income, expenses, and gains and losses during the reported period. Changes in the economic environment, financial markets, and any other parameters used in determining these estimates could cause actual results to differ, and these differences could be material.

a. **SECURITY VALUATION** Equity securities traded on a national securities exchange are valued at the last reported sales price on the last business day of the period. Equity securities reported on the NASDAQ national market are valued at the official closing price on that day. Listed and NASDAQ equity securities for which no sales are reported on that day and other securities traded in the over-the-counter market are valued at the last bid price (asked price for options written) on the valuation date. Equity securities traded primarily in foreign markets are valued at the closing price of such securities on their respective exchanges or markets. Corporate debt, domestic and foreign, and U.S. government securities are generally traded in the over-the-counter market rather than on a national securities exchange. The Company utilizes the latest bid prices furnished by independent pricing services with respect to transactions in such securities to determine current market value if maturity date exceeds 60 days. Investments in such securities maturing within 60 days or less are valued at amortized cost. If, after the close of foreign markets, conditions change significantly, the price of certain foreign securities may be adjusted to reflect fair value as of the time of the valuation of the portfolio. Investments in money market funds are valued at their net asset value. Special holdings (restricted securities) and other securities for which quotations are not readily available are valued at fair value determined in good faith pursuant to specific procedures appropriate to each security as established by and under the general supervision of the Board of Directors. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the price used by other investors or the price that may be realized upon the actual sale of the security.

b. **OPTIONS** The Company may purchase and write (sell) exchange traded put and call options on equity securities. The Company purchases put options or writes call options to hedge the value of portfolio investments while it purchases call options and writes put options to obtain market exposure. The risk associated with purchasing an option is that the Company pays a premium whether or not the option is exercised. Additionally, the Company bears the risk of loss of the premium and a change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. Premiums received from writing options are reported as a liability on the Statement of Assets and Liabilities. Those that expire unexercised are treated by the Company on the expiration date as realized gains on written option transactions in the Statement of Operations. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss on written option transactions in the Statement of Operations. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security in determining whether the Company has realized a gain or loss on investments in the Statement of Operations. If a written put option is exercised, the premium reduces the cost basis of the securities purchased by the Company and is parenthetically disclosed on the Statement of Assets and Liabilities. The Company as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option. For exchange traded options purchased, the Company bears the risk of loss in the amount of the premiums paid plus appreciation in market value should a counterparty fail to perform under the contract. Options written by the Company do not give rise to counterparty risk as options written obligate the Company to perform. The Company has not entered into a master netting agreement with respect to options on equity securities. See Note 4 for option information.

c. **SECURITIES TRANSACTIONS AND INVESTMENT INCOME** Securities transactions are recorded as of the trade date. Realized gains and losses are determined on the specific identification method. Dividend income and distributions to stockholders are recorded as of the ex-dividend dates. Interest income is recognized daily on the accrual basis, adjusted for the accretion of discounts and amortization of premiums.

d. **FOREIGN CURRENCY TRANSLATION AND TRANSACTIONS** Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies versus U.S. dollars on the date of valuation. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Company’s Board of Directors. The Company does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. These changes are combined and included in net realized and unrealized gain or loss on the Statement of Operations.

1. SIGNIFICANT ACCOUNTING POLICIES AND OTHER MATTERS - (continued)

Realized foreign exchange gains or losses may also arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses may also arise from changes in foreign exchange rates on foreign currency denominated assets and liabilities other than investments in securities held at the end of the reporting period.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of U.S. companies as a result of, among other factors, the possibility of political or economic instability or the level of governmental supervision and regulation of foreign securities markets.

e. **DIVIDENDS AND DISTRIBUTIONS** The Company expects to pay dividends of net investment income and distributions of net realized capital and currency gains, if any, annually to common shareholders and quarterly to preferred shareholders. Dividends and distributions to common and preferred shareholders, which are determined in accordance with Federal income tax regulations, are recorded on the ex-dividend date. Permanent book/tax differences relating to income and gains are reclassified to paid-in capital as they arise.

f. **FEDERAL INCOME TAXES** The Company's policy is to fulfill the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all taxable income to its stockholders. Accordingly, no provision for Federal income taxes is required. In accordance with U.S. GAAP requirements regarding accounting for uncertainties in income taxes, management has analyzed the Company's tax positions taken or expected to be taken on Federal and state income tax returns for all open tax years (the current and the prior three tax years) and has concluded that no provision for income tax is required in the Company's financial statements.

g. **CONTINGENT LIABILITIES** Amounts related to contingent liabilities are accrued if it is probable that a liability has been incurred and an amount is reasonably estimable. Management evaluates whether there are incremental legal or other costs directly associated with the ultimate resolution of a matter that are reasonably estimable and, if so, they are included in the accrual.

h. **INDEMNIFICATIONS** In the ordinary course of business, the Company enters into contracts that contain a variety of indemnifications. The Company's maximum exposure under these arrangements is unknown. However, the Company has not had prior claims or losses pursuant to these indemnification provisions and expects any future risk of loss thereunder to be remote.

i. **CORONAVIRUS PANDEMIC** The Coronavirus (COVID-19) pandemic has caused significant humanitarian and economic disruption both nationally and internationally for almost three years. For the most part, governments worldwide have responded with significant fiscal and monetary stimulus to offset the decline in commercial activity. Multiple vaccines and improved treatments have been developed and administered to those seeking immunization or requiring medical intervention with the goal of reducing the impact of the virus. Increased market volatility has occurred as a result of the spread of variants in the virus. More recently, the expiration of fiscal stimulus programs and reduced monetary accommodations by the Federal Reserve (i.e., increasing interest rates, cessation of asset purchases, and asset sales more recently) have contributed to further market volatility. The Company is currently operating in a hybrid work fashion (i.e., work from both home and in the office) but, otherwise continues to operate without significant adverse impact.

2. FAIR VALUE MEASUREMENTS

Various data inputs are used in determining the value of the Company's investments. These inputs are summarized in a hierarchy consisting of the three broad levels listed below:

Level 1 - quoted prices in active markets for identical securities (including money market funds which are valued at net asset value, typically \$1 per share),

Level 2 - other significant observable inputs (including quoted prices for similar securities, interest rates, etc.), and

Level 3 - significant unobservable inputs (including assumptions in determining the fair value of investments).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. No transfers among levels occurred during the year ended December 31, 2022. The following is a summary of the inputs used to value the Company's net assets as of December 31, 2022.

Assets	Level 1	Level 2	Level 3	Total
Common stocks	\$ 1,086,416,070	—	—	\$ 1,086,416,070
Purchased options	1,339,500	—	—	1,339,500
U.S. Treasury bills	—	\$ 74,206,875	—	74,206,875
Money market fund	71,841,530	—	—	71,841,530
Total	\$ 1,159,597,100	\$ 74,206,875	—	\$ 1,233,803,975
Liabilities				
Options written	\$ 883,475	—	—	\$ 883,475

3. PURCHASES AND SALES OF SECURITIES

Purchases and sales of securities (other than short-term securities and options) during 2022 amounted to \$193,450,288 and \$287,564,249, on long transactions, respectively.

4. OPTIONS

In order to enhance financial statement disclosure for derivative instruments, the following table is intended to enable investors to understand: a) how and why the Company uses purchased and written options on equity securities, b) how purchased and written options on equity securities are accounted for, and c) how purchased and written options on equity securities affect the Company's financial position and results of operations. As of December 31, 2022, the Company has not offset any of the positions and the positions are presented gross on the Statement of Assets and Liabilities.

The following table presents options contracts by location and as presented on the Statement of Assets and Liabilities as of December 31, 2022.

UNDERLYING RISK	ASSET OPTIONS		LIABILITY OPTIONS	
	STATEMENT OF ASSETS AND LIABILITIES LOCATION	FAIR VALUE	STATEMENT OF ASSETS AND LIABILITIES LOCATION	FAIR VALUE
Equity	Purchased options	\$ 1,339,500	Outstanding options written, at value	\$ 883,475

The following table presents the effect of options activity on the Statement of Operations for the year ended December 31, 2022.

UNDERLYING RISK	STATEMENT OF OPERATIONS	REALIZED GAIN (LOSS) ON OPTIONS	CHANGE IN UNREALIZED APPRECIATION (DEPRECIATION) ON OPTIONS
Equity	Purchased options	\$ 507,525	\$ 504,344
Equity	Written options	(106,242)	613,118
		\$ 401,283	\$ 1,117,462

The average monthly options activity during the year ended December 31, 2022.

	PURCHASED OPTIONS CONTRACTS	WRITTEN OPTIONS CONTRACTS
Numbers of Contracts	910	1,027

5. CAPITAL STOCK AND DIVIDEND DISTRIBUTIONS

The authorized capital stock of the Company consists of 50,000,000 shares of Common Stock, \$1.00 par value, and 10,000,000 shares of Preferred Stock, \$1.00 par value. With respect to the Common Stock, 23,979,022 shares were issued and outstanding; 8,000,000 Preferred Shares were originally issued and 7,604,687 were outstanding on December 31, 2022.

On September 24, 2003, the Company issued and sold 8,000,000 shares of its 5.95% Cumulative Preferred Stock, Series B in an underwritten offering. The Preferred Shares were noncallable for the 5 year period ended September 24, 2008 and have a liquidation preference of \$25.00 per share plus accumulated and unpaid dividends to the date of redemption.

Cumulatively, the Board of Directors has authorized the repurchase of up to 2 million Preferred Shares in the open market at prices below \$25.00 per share. To date, 395,313 shares have been repurchased.

The Company allocates distributions from net capital gains and other types of income proportionately among holders of shares of Common Stock and Preferred Stock. To the extent that dividends on the shares of Preferred Stock are not paid from net capital gains, they will be paid from investment company taxable income, or will represent a return of capital.

Under the Investment Company Act of 1940, the Company is required to maintain an asset coverage of at least 200% of the Preferred Stock. In addition, pursuant to Moody's Investor Service, Inc. Rating Agency Guidelines, the Company is required to maintain a certain discounted asset coverage for its portfolio that equals or exceeds a Basic Maintenance Amount. If the Company fails to meet these requirements in the future and does not cure such failure, the Company may be required to redeem, in whole or in part, shares of Preferred Stock at a redemption price of \$25.00 per share plus accumulated and unpaid dividends. In addition, failure to meet the foregoing asset coverage requirements could restrict the Company's ability to pay dividends on shares of Common Stock and could lead to sales of portfolio securities at inopportune times.

The holders of Preferred Stock have voting rights equivalent to those of the holders of Common Stock (one vote per share) and, generally, vote together with the holders of Common Stock as a single class.

5. CAPITAL STOCK AND DIVIDEND DISTRIBUTIONS - (continued)

Holders of Preferred Stock will elect two members to the Company's Board of Directors and the holders of Preferred and Common Stock, voting as a single class, will elect the remaining directors. If the Company fails to pay dividends on the Preferred Stock in an amount equal to two full years' dividends, the holders of Preferred Stock will have the right to elect a majority of the directors. In addition, the Investment Company Act of 1940 requires that approval of the holders of a majority of any outstanding Preferred Shares, voting separately as a class, would be required to (a) adopt any plan of reorganization that would adversely affect the Preferred Stock and (b) take any action requiring a vote of security holders, including, among other things, changes in the Company's subclassification as a closed-end investment company or changes in its fundamental investment policies.

The Company presents its Preferred Stock, for which its redemption is outside of the Company's control, outside of the net assets applicable to Common Stock in the Statement of Assets and Liabilities.

Transactions in Common Stock during 2022 and 2021 were as follows:

	SHARES		AMOUNT	
	2022	2021	2022	2021
Par value of Shares issued in payment of dividends and distributions (issued from treasury)	253,791	644,438	\$ 253,791	\$ 644,438
Increase in paid-in capital	—	—	8,933,752	26,873,064
Total increase	253,791	644,438	9,187,543	27,517,502
Par value of Shares purchased (at an average discount from net asset value of 16.8% and 15.1%, respectively)	(666,903)	(980,510)	(666,903)	(980,510)
Decrease in paid-in capital	—	—	(24,468,665)	(39,988,665)
Total decrease	(666,903)	(980,510)	(25,135,568)	(40,969,175)
Net decrease	(413,112)	(336,072)	\$ (15,948,025)	\$ (13,451,672)

At December 31, 2022, the Company held in its treasury 8,001,850 shares of Common Stock with an aggregate cost of \$282,736,751.

The tax basis distributions during the year ended December 31, 2022 are as follows: ordinary distributions of \$4,845,219 and net capital gains distributions of \$42,565,984. As of December 31, 2022, distributable earnings on a tax basis totaled \$664,077,324 consisting of \$3,257,712 from undistributed net capital gains and \$660,819,612 from net unrealized appreciation on investments. Reclassifications arising from permanent "book/tax" difference reflect non-tax deductible expenses during the year ended December 31, 2022. As a result, additional paid-in capital was decreased by \$1,325,000 and total distributable earnings was increased by \$1,325,000. Net assets were not affected by this reclassification. As of December 31, 2022, the Company had wash loss deferrals of \$192,525 and straddle loss deferrals of \$2,408,944.

6. OFFICERS' COMPENSATION

The aggregate compensation accrued and paid by the Company during the year ended December 31, 2022 to its officers (identified on page 28) amounted to \$7,955,000 of which \$2,375,000 was payable as of year end.

7. BENEFIT PLANS

The Company has funded (qualified) and unfunded (supplemental) defined contribution thrift plans that are available to its employees. The aggregate cost of such plans for 2022 was \$77,606. The qualified thrift plan acquired 43,658 shares in the open market of the Company's Common Stock during the year ended December 31, 2022. It held 603,863 shares of the Company's Common Stock at December 31, 2022.

The Company also has both funded (qualified) and unfunded (supplemental) noncontributory defined benefit pension plans that cover its employees. The pension plans provide a defined benefit based on years of service and final average salary with an offset for a portion of Social Security covered compensation. The investment policy of the pension plan is to invest not less than 80% of its assets, under ordinary conditions, in equity securities and the balance in fixed income securities. The investment strategy is to invest in a portfolio of diversified registered investment funds (open-end and exchange traded), an unregistered partnership, and U.S. Treasury bills. Open-end funds and the unregistered partnership are valued at net asset value based upon the fair market value of the underlying investment portfolios. Exchange traded funds are valued based upon their closing market price. U.S. Treasury bills are valued using broker bid prices if over 60 days till maturity and at amortized cost if maturing within 60 days or less.

The Company recognizes the overfunded or underfunded status of a defined benefit postretirement plan as an asset or liability in the Statement of Assets and Liabilities and recognizes changes in funded status in the year in which the changes occur through other comprehensive income.

7. BENEFIT PLANS - (continued)

OBLIGATIONS AND FUNDED STATUS OF DEFINED BENEFIT PLANS:

	DECEMBER 31, 2022 (MEASUREMENT DATE)

Recognized net actuarial loss	59,704	91,752	151,456
Net periodic benefit cost	<u>\$ (693,029)</u>	<u>\$ 435,739</u>	<u>\$ (257,290)</u>

7. BENEFIT PLANS - (continued)

The Company's qualified pension plan owns assets as of December 31, 2022 comprised of \$15,885,190 of equity securities and \$3,239,052 of money market fund assets classified as Level 1, \$1,443,075 of U.S. Treasury bills classified as Level 2, and \$4,338,599 of limited partnership interest and \$8,186 of interest receivable which are not classified by level.

	QUALIFIED PLAN	SUPPLEMENTAL PLAN	TOTAL
EXPECTED CASH FLOWS:			
Expected Company contributions for 2023	—	\$ 280,968	\$ 280,968
Expected benefit payments:			
2023	\$ 1,057,673	\$ 280,968	\$ 1,338,641
2024	1,133,633	308,689	1,442,322
2025	1,201,452	339,091	1,540,543
2026	1,234,448	341,038	1,575,486
2027	1,246,015	367,056	1,613,071
2028-2032	6,385,910	1,953,963	8,339,873

8. OPERATING LEASE COMMITMENT

The Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-02, Leases, which requires lessees to reassess if a contract is or contains lease agreements and assess the lease classification to determine if they should recognize a right-of-use asset and offsetting liability on the Statement of Assets and Liabilities that arises from entering into a lease, including an operating lease. The right-of-use asset and offsetting liability is reported on the Statement of Assets and Liabilities in line items entitled, "Present value of future office lease payments." Since the operating lease does not specify an implicit rate, the right-of-use asset and liability have been calculated using a discount rate of 3.0%, which is based upon high quality corporate interest rates for a term equivalent to the lease period as of January 1, 2018. The annual cost of the operating lease continues to be reflected as an expense in the Statements of Operations and Changes in Net Assets.

In 2017, the Company entered into an operating lease agreement for office space which will expire in 2028 and provide for aggregate rental payments of approximately \$6,437,500. The lease agreement contains clauses whereby the Company will receive free rent for a specified number of months and credit towards construction of office improvements and incurs escalations annually relating to operating costs and real property taxes and to annual rent charges beginning in 2023. Rental expense approximated \$594,200 for the year ended December 31, 2022. The Company has the option to extend the lease for an additional five years at market rates. As of December 31, 2022, no consideration has been given to extending this lease. Minimum rental commitments under this operating lease are approximately:

2023	\$ 631,000
2024	663,000
2025	663,000
2026	663,000
2027	663,000
Thereafter	553,000
Total Remaining Lease Payments	3,836,000
Effect of Present Value Discounting	(318,616)
Present Value of Future Office Lease Payments	<u>\$3,517,384</u>

TO THE BOARD OF DIRECTORS
AND STOCKHOLDERS OF
GENERAL AMERICAN INVESTORS COMPANY, INC.

Opinion on the Financial Statements

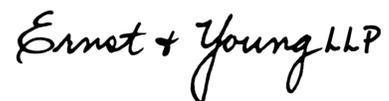

We have audited the accompanying statement of assets and liabilities of General American Investors Company, Inc. (the "Company"), including the statement of investments, as of December 31, 2022, and the related statement of operations for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, the financial highlights for each of the five years in the period then ended and the related notes (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2022, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended and its financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of the Company's internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of December 31, 2022, by correspondence with the custodian, brokers and others; when replies were not received from brokers, we performed other auditing procedures. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

The signature of Ernst & Young LLP is written in a cursive, handwritten style in black ink.

We have served as the Company's auditor since 1949.
New York, NY
February 15, 2023

General American Investors Company, Inc. (the “Company”) was organized as a Delaware corporation on October 15, 1928 and succeeded to a similar business established in 1927. The Company is a diversified closed-end investment company and is an internally managed independent organization. The principal investment objective of the Company is long-term capital appreciation. Lesser emphasis is placed upon current income. In seeking to achieve its primary investment objective, the Company invests principally in common stocks believed by management to have better-than-average growth potential. Fundamental policies are as follows:

- The Company may issue debt and senior equity securities to the extent permitted by the Investment Company Act of 1940.
- The Company may not borrow money in excess of 25% of its gross assets, except for the purchase or redemption of outstanding senior securities.
- The Company may not underwrite securities in excess of 20% of its gross assets.
- The Company’s holdings in a particular industry may not be increased by additional investment in that industry beyond 50% of the value of the Company’s gross assets. (The Company’s non-fundamental operating policy, however, is not to invest 25% or more of its assets in any one particular industry based upon the Global Industry Classification Standard.)
- The Company does not purchase or sell real estate.
- The Company may not trade in commodities and commodity contracts in excess of 20% of its gross assets.
- The Company may not make loans (other than through the purchase of a portion of an issue of bonds, debentures or other securities issued by another person) to other persons in an amount exceeding 10% to any one person or exceeding in the aggregate 20% of its gross assets.
- The Company does not make investments for the purpose of participating in management, although it maintains the freedom to do so if it should become necessary to conserve any investment.

Other than as set forth above and subject to the requirements of the Investment Company Act of 1940, and associated rules and regulations, relating to diversified investment companies, the Company’s investment policy is flexible, as its charter permits investment in all forms of securities without limiting the portion of its assets which may be invested in any one type.

PRINCIPAL RISK FACTORS OF INVESTING IN THE COMPANY (UNAUDITED)

As a general matter, risk is inherent in all investing activities. It can range from the inability to achieve one’s investment objectives, to performance that falls short of other investment options, to the loss of some or all invested capital. The Company invests principally in common stocks. On a relative basis, common stocks are generally subject to greater risks than many other asset classes. An equity-oriented portfolio held within an exchange traded closed-end investment company structure, such as the Company, has two layers of equity risk (the investment portfolio and the holding structure), which can amplify the level of risk suggested above. As of December 31, 2022, the Company was also approximately 15.2% leveraged as measured based upon the outstanding liquidation preference (or value) of its fixed rate 5.95% Cumulative Preferred Stock, Series B (“Preferred Stock”) relative to the gross assets of the Company. This leverage can further magnify the Company’s risk profile. The following are among the more significant risks of investing in the Company and it should also be understood that the risk categories described in the following narrative can have overlapping effects and/or exacerbate the risks described in other categories.

Equity and Market Oriented Risks

Stock market risk is the risk that stock prices can or will decline. Stock markets tend to move in cycles, with periods of rising prices and periods of falling prices that can extend over long periods of time. Stock market disruptions can also adversely affect local, national and global markets and their orderly operation. Any such disruptions could have an adverse impact on the value of the Company’s investments, the Company’s common stock and the Company’s performance.

Investment style risk is the risk that the Company’s return, due to management’s investment decisions, will trail returns from the overall stock market or the Company’s benchmark, the S&P 500 stock index.

Common stock represents an equity or ownership interest in an issuer. Common stock typically entitles the owner to vote on the election of directors and other important matters, as well as to receive dividends on such stock. In the event an issuer is liquidated or declares bankruptcy, the claims of owners of bonds, other debt holders, and owners of preferred stock take precedence over the claims of those who own common stock.

Equity and other investments in larger, more established companies may involve certain risks associated with their larger size. For instance, larger companies may be less able to respond quickly to new competitive challenges, such as changes in consumer tastes or innovation from smaller competitors. Also, larger companies are sometimes less able to achieve growth rates as high as successful smaller companies, especially during extended periods of economic expansion.

Investing in securities of small-cap and mid-cap companies may involve greater risks than investing in securities of larger, more established issuers. Small-cap and mid-cap companies may be engaged in business within a narrow geographic region, be less well-known to the investment community, and have more volatile share prices. These companies often lack management depth and have narrower market penetration, less diverse product lines, and fewer resources than larger companies. Moreover, the securities of such companies often have less market liquidity and, as a result, their stock prices often react more strongly to changes in the marketplace.

The Company invests in both domestic equity securities with significant foreign subsidiaries, operations, and/or revenues and in foreign domiciled equity securities to the extent necessary to carry out its investment objectives. The value in U.S. dollars of the Company's non-dollar-denominated foreign securities or domestic securities with significant foreign subsidiaries, operations and/or revenues may be affected favorably or unfavorably by changes in foreign currency exchange rates or exchange control regulations, and the Company may incur costs in connection with conversions between various currencies.

Investing in foreign securities involves certain special risk considerations that are not typically associated with investing in securities of U.S. entities. Because foreign issuers are not generally subject to uniform accounting, auditing and financial reporting standards and practices comparable to those applicable to U.S. issuers, there may be less publicly available information about certain foreign issuers than about U.S. issuers. Securities of foreign issuers can be more volatile and potentially less liquid than securities of comparable U.S. issuers, and foreign investments may be affected through structures that may be complex or confusing. In certain countries, there is less government supervision and regulation of stock exchanges, brokers and listed companies than in the United States. The risk that securities traded on foreign exchanges and foreign domiciled equity securities traded on U.S. exchanges may be suspended, either by the issuers themselves, by an exchange, or by government authorities, is also potentially greater. In addition, with respect to certain foreign countries, there is the possibility of expropriation or confiscatory taxation, political or social instability, war, terrorism, nationalization, limitations on the removal of funds or other assets, or diplomatic developments that could affect U.S. investments in those countries. Additionally, economic or other sanctions imposed on the United States by a foreign country or imposed on a foreign country or issuer by the United States, could impair the Company's ability to buy, sell, hold, or otherwise transact in certain investment securities. Sanctions could also affect the value and/or liquidity of a foreign security.

The Company invests in certain derivatives on equity securities to carry out its investment objectives. A derivative is a financial instrument that has a value based on or "derived from" the values of other assets, indexes or reference points. Derivatives the Company typically invests in include options on equity securities, caps, floors, and collars. Some derivatives, such as equity options, are traded on U.S. securities exchanges, while other derivatives may be privately negotiated and entered into in the over-the-counter market or may be cleared through a clearinghouse or through an execution facility. Derivatives may be used for a variety of purposes, including but not limited to hedging, managing risk, seeking to stay more fully invested, seeking to reduce transaction or tax costs, seeking to simulate an investment in an equity security or other investments, and seeking to add value by using derivatives to establish portfolio positions when derivatives are favorably priced relative to equity securities or other investments. Derivatives may be used for speculative purposes and at other times their use may not constitute speculation. There is no assurance that any derivatives strategy used by the Company will succeed and the Company may incur losses through its use of derivatives.

Increasingly, climate risks (i.e., usage of fossil fuels, discharge of hydrocarbons, impact of global warming, etc.) are becoming a greater influence upon financial market valuations, liquidity and investment returns.

General Market, Market Discount and Trading Risks

In recent years, the U.S. has experienced historically low interest rates, increasing the exposure of equity investors to the risks associated with rising interest rates, which occurred during 2022. The prices of common stock may fluctuate more than the prices of other asset classes as and if interest rates change.

Inflation risk is the risk that the value of assets or income from the Company's investments will be worth less in the future as inflation decreases the value of payments at future dates. As inflation increases, the real value of the Company's portfolio could decline. Deflation risk is the risk that prices throughout the economy decline over time. Deflation may have an adverse effect on the financial stability of issuers and may put securities issuers at risk which may result in a decline in the value of the Company's portfolio.

Liquidity risk is the risk that the Company may invest in securities that trade in lower volumes and may be less liquid than other investments or that the Company's investments may become less liquid in response to market developments or adverse investor perceptions. Illiquidity may be the result of, for example, low trading volumes, lack of a market maker or restrictions that limit or prevent the Company from selling securities or closing positions. When there is no willing buyer and investments cannot be readily sold or closed out, the Company may have to sell an investment at a substantially lower price than the price at which the Company last valued the investment for purposes of calculating its net asset value ("NAV") or it may not be able to sell the investments at all, each of which would have a negative effect on the Company's performance and may cause the Company to hold an investment longer than management would otherwise desire.

In response to market conditions, the Company may temporarily depart from its normal investment objectives and policies when management believes that doing so is in the Company's best interest.

Although the Company generally seeks to invest for the long term, it may sell securities regardless of how long they have been held. This may cause the Company's turnover rate and transaction costs to rise, which may lower the Company's performance and may increase the likelihood of capital gains distributions.

The market price of the Company's shares will most likely differ from its NAV. There may also be times when the market price and the NAV differ significantly, with a discount to NAV being more typical historically (the Company's shares rarely, if ever, trade at a premium to NAV). Thus, you will likely pay less (a discount) than the current NAV when you buy the Company's shares on the secondary market, and you will likely receive less than NAV when you sell those shares. These discounts (in rare instances, premiums) are likely to be greatest during times of market disruption or extreme market volatility.

The Company's shares are listed for trading on the New York Stock Exchange (NYSE) and are bought and sold on this secondary market at market prices. Although the Company's shares are listed for trading on the NYSE, it is possible that an active trading market may not be maintained.

Trading of the Company's shares may be halted by the activation of individual or market-wide trading halts (which halt trading for a specific period of time when the price of a particular security or overall market prices decline by a specified percentage). Trading of the Company's shares may also be halted if (1) the shares are delisted from the NYSE without first being listed on another exchange or (2) NYSE officials determine that such action is appropriate in the interest of a fair and orderly market or for the protection of investors.

Unlike shares of an open-end mutual fund, the Company's shares are not individually redeemable.

The Company's shares are intended for long-term investors and should not be treated as a trading vehicle.

An investment in the Company is not a deposit in a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

Leverage Risk and Effects Thereof

The use of leverage magnifies the losses or gains that would otherwise be generated by the Company's investment portfolio. Additionally, leverage has a recurring direct annual cost to the Company.

The Company employs the use of leverage through its issuance on September 24, 2003, via an underwritten offering, of its Preferred Stock. The Preferred Stock has a liquidation preference of \$25 per share plus accumulated and unpaid dividends to the date of redemption. The Company can otherwise employ leverage in the management of the portfolio but has thus far not done so.

There are 7,604,687 shares of \$25 per share Preferred Stock outstanding having a total liquidation preference of \$190,117,175. The aggregate annual amount of the four equal quarterly dividend payments is \$11,311,972. The Company has approximately \$1.25 billion in gross portfolio assets as of December 31, 2022. Therefore, the total portfolio would be required to generate an annual return of approximately 0.92% to cover the annual dividend payments on the Preferred Stock.

The information below is designed to illustrate the effects of leverage through the use of senior securities under the Investment Company Act of 1940.

These assumed investment portfolio returns are hypothetical figures and are not necessarily indicative of the investment portfolio returns experienced or expected to be experienced by the Company. Your actual returns may be greater or less than those appearing below. In addition, actual expenses associated with borrowings or other forms of leverage, if any, used by the Company may vary and could be significantly higher or lower than the rates used for the example below.

Assumed Return on Portfolio (Net of Expenses)	(10.00)%	(5.00)%	0.00%	5.00%	10.00%
Corresponding Return to Common Stockholders:	(12.40)%	(6.64)%	(0.88)%	4.88%	10.64%

Return to Common Stockholders (above) is composed of three elements:

- The dividends and distributions paid to and reinvested by the holders of the common stock of the Company.
- Other realized and unrealized gains or losses in the value of the portfolio securities and other assets and liabilities of the Company not distributed to common shareholders.
- The cost of leverage of the Company, which consists of the preferred stock dividend described above, which is \$11,311,972 or 1.02% of the average net assets of the common shareholders during the year.

As required by SEC rules, the table above assumes that the Company is more likely to suffer capital losses/ depreciation than to enjoy capital gains/appreciation. For example, to achieve a total return of 0.00%, the Company must assume that gross income on its investments is entirely offset by Company expenses and losses in the value of those investments.

Structural, Operating and Employee Related Risks

The Company operates as an internally managed closed-end fund (i.e., the management, advisory and administrative functions are performed by individuals directly employed by and “resident” within the Company; not a contractual service provider or external management/advisory firm) and the Company and its service providers depend on complex information technology and communications systems to conduct business functions, making them susceptible to operational and information security risks. For example, design or system failures or malfunctions, human error, faulty software or data processing systems, power or communications outages, acts of God, or cyber-attacks may lead to operational disruptions and potential losses to the Company. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information, and causing operational disruption. Successful cyber-attacks against, or security breakdowns at, the Company, its custodian and accounting agent, pricing and data vendors, transfer agent, and/or other third-party service providers may adversely impact the Company and its shareholders. For instance, cyberattacks or other operational issues may interfere with the processing of shareholder transactions, impact the Company’s ability to calculate its NAV, cause the release of private shareholder information or confidential Company information, impede trading, cause reputational damage, and subject the Company to regulatory fines, penalties or financial losses, reimbursement, other compensation costs, and/or additional compliance costs. The Company also may incur substantial costs for cybersecurity risk management to guard against any cyber incidents in the future. In general, cyber-attacks result from deliberate attacks, but unintentional events may have similar effects to those caused by cyber-attacks. Similar types of risks also are present for issuers of securities in which the Company invests, which could result in material adverse consequences for such issuers and may cause the Company’s investment in such securities to lose value. In addition, cyber-attacks involving a counterparty to the Company could affect such a counterparty’s ability to meet its obligations to the Company, which may result in losses to the Company and its shareholders. In addition, the adoption of work-from-home arrangements by the Company and/or its service providers due to the COVID-19 pandemic could increase all of the above risks, create additional data and information accessibility concerns, and make the Company and/or its service providers more susceptible to operational disruptions, any of which could adversely impact their operations. While the Company or its service providers may have established business continuity plans and systems designed to guard against such operational failures and cyber-attacks and the adverse effects of such events, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified, in large part because different or unknown threats or risks may emerge in the future. The Company does not control the business continuity and cybersecurity plans and systems put in place by third-party service providers, and such third-party service providers may have no or limited indemnification obligations to the Company.

The Company is exposed to operational risks arising from several factors, including, but not limited to: human error; processing and communication errors; errors of the Company’s service providers, counterparties, or other third-parties; failed or inadequate processes and/or technology; or systems failures. The Company seeks to reduce these operational risks through controls and procedures. However, these measures do not address every possible risk and may be inadequate to address significant operational risks.

The Company is dependent upon key and a limited number of personnel. Jeffrey W. Priest serves as a President, Chief Executive Officer, and the portfolio manager of the Company. The Company is dependent upon the expertise of Mr. Priest in providing investment advice and management with respect to the Company’s investments. If the Company were to lose the services of Mr. Priest, it could be adversely affected. There can be no assurance that a suitable replacement could be found for Mr. Priest in the event of his death, resignation, retirement, or inability to act on behalf of the Company.

Misconduct or misrepresentations by employees of the Company or its service providers could cause significant losses to the Company. Employee misconduct may include binding the Company to transactions that exceed authorized limits or present unacceptable risks and unauthorized trading activities, concealing unsuccessful trading activities (which, in any case, may result in unknown and unmanaged risks or losses) or making misrepresentations regarding any of the foregoing. Losses could also result from actions by the Company’s service providers, including, without limitation, failing to recognize trades and misappropriating assets. In addition, employees and service providers may improperly use or disclose confidential information, which could result in litigation or serious financial harm. Despite the Company’s due diligence efforts, misconduct and intentional misrepresentations may be undetected or not fully comprehended, thereby potentially undermining the Company’s due diligence efforts. As a result, no assurances can be given that the due diligence performed by the Company will identify or prevent any such misconduct.

Events surrounding the COVID-19 pandemic have contributed to, and may continue to contribute to, significant market volatility, reductions in economic activity, market closures and declines in global financial markets. These effects may last for an extended period and could result in a substantial economic downturn or recession. Governmental responses may be inadequate and exacerbate other pre-existing political, social, economic, market, and financial risks. These events may have a significant adverse effect on the Company’s performance and on the liquidity of the Company’s investments and have the potential to impair the ability of Company management and employees or the Company’s external service providers to serve the Company. This could lead to further operational disruptions that may negatively impact the Company. Markets may, in response to governmental actions or intervention, experience periods of high volatility and reduced liquidity. During such periods, the Company may have to or deem it appropriate to sell securities at times when it would otherwise not do so, potentially at unfavorable prices.

The Company has a long-term lease commitment which expires in the fourth quarter of 2028 with aggregate rental payments of approximately \$6,437,500.

The Company has both funded (qualified) and unfunded (supplemental) noncontributory defined benefit pension plans and funded (qualified) and unfunded (supplemental) defined contribution thrift plans that are available to its employees. As a result of the terms of these plans and applicable generally accepted accounting principles pertaining thereto, the Company may be required to increase expenses and write-up the associated liabilities of these plans in its accounting records under varying circumstances. In the case of the pension plan, if interest rates decline, stock prices decline, or there are significant declines in mortality, among other factors, additional projected expenses and accrued liabilities may be required to be recorded in the Company's financial statements to reflect those events. In the case of the supplemental thrift plan, a greater expense and accrued liability will be recorded as the Company's stock price increases and the associated unfunded liability of the supplemental thrift plan increases.

Certain provisions in the Company's Restated Certificate of Incorporation or By-Laws include provisions that could limit the ability of other entities or persons to merge it or to consolidate it with an open-end fund, to dissolve the Company, to sell all or substantially all of the assets of the Company, or to make the common stock of the Company a redeemable security. These provisions could have the effect of depriving common stockholders of opportunities to sell their common stock at a premium over the then-current market price of the Company's common stock.

Governmental, Political, Regulatory and Compliance Risks

The United States and other governments and the Federal Reserve and certain foreign central banks have taken steps in the past to support financial markets, most recently in response to the COVID-19 pandemic. The withdrawal of support, as was the case in 2022, failure of efforts in response to a financial crisis, or investor perception that those efforts are not succeeding could negatively affect financial markets generally as well as the values and liquidity of certain securities. Federal, state, and other governments, their regulatory agencies, or self-regulatory organizations may take actions that affect the regulation of the securities in which the Company invests or the issuers of such securities in ways that are unforeseeable. Legislation or regulation also may change the way in which the Company is regulated. Such legislation, regulation or other government action could limit or preclude the Company's ability to achieve its investment objectives and affect the Company's performance.

Political, social, or financial instability; civil unrest; and acts of terrorism are other potential risks that could adversely affect an investment in a security or in markets or issuers generally. In addition, political developments in foreign countries or the United States may at times subject such countries to sanctions from the U.S. government, foreign governments, and/or international institutions that could negatively affect the Company's investments in issuers located in, doing business in, or with assets in such countries.

The Company has elected to be treated as a Regulated Investment Company ("RIC") under the Internal Revenue Code, as amended, and intends each year to qualify and be eligible to be treated as such. If the Company qualifies as a RIC, it generally will not be subject to U.S. federal income tax on its net investment income or net short-term or long-term capital gains, distributed (or deemed distributed) to shareholders, provided that, for each taxable year, the Company distributes (or is treated as distributing) to its shareholders an amount equal to or exceeding 90% of its "investment company taxable income" as that term is defined in the Code (which includes, among other things, dividends, taxable interest and the excess of any net short-term capital gains over net long-term capital losses, as reduced by certain deductible expenses). The Company intends to distribute all or substantially all of its investment company taxable income and net capital gain each year. In order for the Company to qualify as a RIC in any taxable year, the Company must meet certain asset diversification tests and at least 90% of its gross income for such year must represent qualifying income. If for any taxable year the Company were to fail to meet the income or diversification tests described above, the Company could in some cases cure the failure, including by paying a tax and, in the case of a diversification test failure, disposing of certain assets. The Company's investments therefore may be limited by the Company's intention to qualify as a RIC and may bear on the Company's ability to so qualify. If the Company were ineligible to or otherwise failed to qualify as a RIC, it would be treated as a corporation subject to U.S. federal income tax, thereby subjecting any income earned by the Company to income tax at the corporate level and, when such income is distributed, to a further tax as dividends at the shareholder level to the extent of the Company's current or accumulated earnings and profits.

The Company is registered under the Investment Company Act of 1940 and is subject to many requirements pursuant to its registration with the Securities and Exchange Commission and associated regulation (e.g., Securities Act of 1933, Securities Exchange Act of 1934, Regulation S-X, Regulation S-K, etc.). Violation of the above and other rules and regulations, unintended or otherwise, could result in additional regulation of the Company, enforcement actions by regulators, limitations on the Company's ability to operate as described above, and/or fines, penalties and other forms of financial impairment. The above could severely limit or preclude the Company's ability to achieve its investment objectives, affect the Company's performance, or limit the Company's ability to operate as intended.
